The Cutting Edge of Technology – Enhanced Biblical Research

Presenters

Session 1

John Schwandt

Director, Logos Mobile Education

Session 2

Michael Meiser

Senior Account Executive, Faithlife Corporation

WORKSHOP OVERVIEW

The capabilities provided by the tools and technology for biblical/theological research available in the marketplace today are astounding. The problem...many of those being trained for ministry are tasked with learning how to use these tools on their own. Are the students at your institution being trained to use today's tools and technology to develop life-changing study habits? How can you as a leader at your institution practically leverage these tools to reduce pedagogical friction, increase institutional effectiveness, and produce students who are better prepared for life-long ministry? Join representatives from Faithlife Corporation, the makers of Logos Bible Software, to discuss ways to set your institution apart and more effectively meet the needs of the 21st century student.

Mini Workshop | Thursday, February 9

8:30 – 9:30

Session 1 — Equipping for Ministry in the 21st Century

- Understand the traditional model of theological/biblical equipping and training
- Identify the changing face of today's student
- Learn the challenges of meeting the needs of the non-traditional student
- Raise the bar with the right tools and methods

9:30 – 10:00

Q & A Discussion

10:00 – 10:30

Refreshment Break

10:30 – 11:30

Session 2 — Enhanced Biblical Research: A Glimpse into the Possible

- Take a look at what is possible with Logos Bible Software 7
- Discover how you can make your institution a premier place of biblical training
- Explore the benefits and challenges of platform standardization
- Discuss practical steps toward implementation

11:30 – 12:00

Q & A Discussion & Wrap-up
