

1

Generative AI could bring the following:

- Unprecedented scale
- The Tower of Babel
- Increased Leisure and Wealth for some
- Broad and Consistent Conflict
- The End of Privacy
- The Collapse and Restructuring of Moral Agency
- The Rise of Prophets
- Some Things won't change

2

Your Use of AI -

Do you use generative AI in course development or lesson preparation?

How do you use it?

3

You College and AI protocol -

Does your school have an overall generative AI policy for staff?

Is there a policy governing faculty use of generative AI?

Is there a policy governing student use of AI or is each faculty member free to establish his or her own policy?

4

AI models and Christianity

What happens when we ask generative AI platforms “Christian Questions”?

The Alignment Problem

5

Large Language Model AI

Words and Statistics

Strengths

Weaknesses

6

Develop a Personal Framework for AI Use

Green = areas
where you should
use AI

Yellow = Christian
Liberty and
wisdom is
needed

Red = Absolutely
not

7

For Christians AI is a Theological Issue

For what use can this
technology be compatible with
our Christian Worldview?

For what use can this
technology be incompatible
with our Christian Worldview?

Key: No
technology is
morally neutral!

All technology
comes with
imbedded
values

8

How can I use AI effectively as an educator?

9

Students will use AI

How can I use AI engagement in my assignments in ways that aid student learning rather than short cut that learning?

Will I ever be able to totally ban AI engagement on the part of students?

10

What's important

There isn't one "Christian" way to handle generative AI

What is critical for every faculty member and every institution?

- Clarity about AI usage
- Proactivity in terms of articulating that to students
- Written policies for staff, faculty, and students
